## Concise Statement of Facts/Complaint: \* (This section must be completed. Attach additional information to this page if necessary.)

I am writing regarding the excessive rate increase planned by Tega Cay Water Service. Although I do not live in the service area of this public utility, I do live in Tega Cay. What affects one area of our city ultimately affects all areas of our city. People will not move into an area where high prices and poor quality of service are present. Foul tasting water with black specs in it, sewers backing up into people's homes, and frequent shutdowns are not conducive to getting new people to live in our city. This level of service is unacceptable on any level. TCWS should have been addressing issues and updating their systems on a regularly scheduled basis to better meet their customers needs. This is what responsible businesses do. Instead they chose to wait until the problems reached a crescendo and system failure was eminent. Now they expect their customers to pay for upgrades that have not even addressed all of the problems present. A failure on their part is not a failure on their customers part and I'm fairly certain TCWS did not share their profits with customers while they let the system continue to deteriorate. As I said in the beginning, this affects all of Tega Cay by lowering the value of our property. No one wants to purchase in an area with excessively high prices coupled with poor service without getting some type of compensation for it - for example, a lower home price. Buyers don't distinguish between one area of Tega Cay or another, they look at the whole picture. When we allow a public utility to have that kind of power, we begin a slide down a slippery slope and I'm fairly certain the landing will not be to our liking.

Respectfully,

Janet Pritchard

## Relief Requested: \* (This section must be completed. Attach additional information to this page if necessary.)

I would strongly suggest that the TCWS significantly lower the rate increase requested. A drastic increase in difficult economic times is tough for the average family and worse for those on a fixed income.

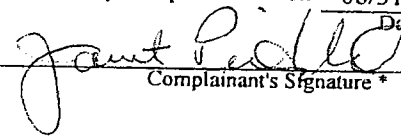

Put together a plan to address issues that have yet to be resolved and also a long term maintenance plan that is shared with your customers so they can see what your goals are. Sometimes a open-book policy is best in these situations. If you always put your customers first you will not fail and you'll still make a lot of money.
